CONTACT INFO	National Wind Technology Center, National Renewable Energy Laboratory 18200 CO-128, Boulder, Colorado 80303, USA e-mail: <a href="mailto:georgios.deskos@nrel.gov">georgios.deskos@nrel.gov</a> , <a href="#">Personal website</a>	
ACADEMIC METRICS	<b>h-index: 9, Google Scholar Citations: 261</b> <a href="#">Google Scholar</a> , <a href="#">ResearchGate</a>	
AREAS OF EXPERTISE	High-fidelity modelling of offshore wind energy, Air-sea interaction, Wake modelling and control, Multiphase flows, Extreme-event modeling	
RESEARCH APPOINTMENTS	<b>Researcher IV - Mechanical Engineering</b>	August 2023 to present National Renewable Energy Laboratory, Boulder, USA
	<ul style="list-style-type: none"> <li>i) Project leadership to a number of DOE-funded projects including direct program funding and joint-industry projects.</li> <li>ii) Technical leadership: Air-sea interactions and wind-wave high-fidelity modeling for floating offshore wind.</li> </ul>	
	<b>Researcher III - Computational Science</b>	May 2021 to August 2023 National Renewable Energy Laboratory, Boulder, USA
	<b>Postdoctoral researcher</b>	October 2019 to May 2021 National Renewable Energy Laboratory, Boulder, USA Projects: <a href="#">DOE A2e High Fidelity Modeling</a> Role: Developing the offshore capabilities for next-generation wind-farm simulators.
	<b>Postdoctoral Research Associate</b>	July 2018 to August 2019 Department of Aeronautics, Imperial College London Project Title: FENGBO-WIND - Farming the ENvironment into the Grid: Big data in Offshore Wind. <a href="#">EPSRC Reference: EP/R007470/1</a>
	<b>Research Assistant</b>	Oct 2014 to Oct 2015 Department of Civil and Environmental Engineering, Imperial College London Project Title: Towards a unified approach for the hydrodynamic modelling of Wave Energy Converters: effective linkage of non-linearity and viscous damping in potential flow models. <a href="#">EPSRC Reference: EP MO019977/1</a>
EDUCATION	<b>Imperial College London</b> , London, UK	
	Ph.D., Earth Science and Engineering, February 2019 <ul style="list-style-type: none"> <li>• Thesis topic: <i>Numerical simulations of wind turbine wakes</i></li> <li>• Supervisors: Prof. Matthew D. Piggott and Dr. Sylvain Laizet</li> </ul>	
	<b>Virginia Tech</b> , Blacksburg, USA	
	M.Sc., Civil Engineering, August 2014 <ul style="list-style-type: none"> <li>• Research topic: <i>Incipient motion of a non-cohesive particle under Stokes flow conditions</i></li> <li>• Supervisor: Prof. Panayiotis Diplas</li> </ul>	
	<b>National Technical University of Athens</b> , Athens, Greece	

BEng, Meng Civil Engineering, March 2012

- Research topic: *Buoyant turbulent jets in confined domains: A numerical approach*
- Supervisor: Assoc. Prof. Panos Papanicolaou

#### AWARDS

- NREL President's Award (2023)
- NREL President's Award (2021)
- Scholarship for participating in Argonne Training Program in Extreme-scale computing (ATPESC 2020)
- ARCHER Image and Video Competition for 2018, 2019
- Third place in ERCOFTAC's Osborne Reynolds Day competition (2018)
- Energy Futures Lab, Director of Education PhD Scholarship (2015)
- Virginia Tech, Pratt Fellowship (2013)
- NTUA, Greek State Scholarships Foundation (2006)
- Eurobank award and cash prize "The Great Moment in Education" (2006)
- Bronze medal in the National Mathematical Olympiad (Archimedes) organized by the Hellenic Mathematical Society for high school students (2006)
- First place in the qualifying math competitions (Euclid) organised by the Hellenic Mathematical Society (2005, 2006)

#### FUNDING

- (2023-present) co-PI to the DOE-funded joint-industry partnership (JIP) project : Inter-array wake interaction in the US East coast
- (2022-present) PI to the DOE-funded project STORM (Simulation-based Turbine design fOr Resilience and loads Mitigation)
- (2019) PI for accessing computational time on ARCHER through the UK Turbulence Consortium (2019), total 15,240 kAUs with notional cost of £8,535
- (2019) PI, UK-China ORE Flexible Fund to conduct initial feasibility study to extend modelling capabilities of PhD-developed open-source code WInc3D to floating offshore wind farms £15,000
- (2018) PI for accessing computational time on ARCHER through the UK Turbulence Consortium (2018), total 15,120 kAUs with notional cost of £8,467
- (2018) Contributor to an EU funded project (MARINET2, OFCTiTuPerf), total amount received £2,000
- (2015) PhD Scholarship from the Energy Futures Lab, Imperial College London that fully funded my doctoral studies for three years. Total amount awarded £48,456

RESEARCH  
PROJECT  
SUPERVISION

Period	Name	Project title	Co-supervisor
2019-23	Amy Hodgkin	Wind turbine tip vortices under shear and thermal stratification ( <b>PhD</b> )	S. Laizet
2018-19	Anastasia Fragkou	Modelling the mixing and dispersion of brine discharge from desalination plants in coastal seas ( <b>MRes</b> )	M. D. Piggott
2018-19	Matthew Bennion	Application of Proper Orthogonal Decomposition to Wind Turbine Wakes ( <b>MEng</b> )	S. Laizet
2017-18	Aoife Henry	Optimal control of tidal turbine wakes ( <b>UROP</b> )	M.D. Piggott
2017-18	Sofia Walker-Saez	Condition-Based Maintenance of Offshore Wind Farms: The Use of SCADA Data in Normal Behaviour Modelling ( <b>MSc</b> )	M.D. Piggott
2016-17	Zulkeefal Dar	uRANS-ALM Modelling of Vertical Axis Turbines ( <b>MSc</b> )	M.D. Piggott
2015-16	Napat Tongmark	Unsteady loading of tidal turbine blades ( <b>MSc</b> )	J. Spinneken

TEACHING  
EXPERIENCE

Period	Module	Role	Hours
2018-19	Finite Element Methods (PG) <i>IC-AERO</i>	Lecturer	12
2017-18	Advanced Programming (UG) <i>IC-ESE</i>	Tutorial Sessions	21
2015-17	Computational Methods (UG) <i>IC-CEE</i>	Tutorial Sessions	48
2015-17	Fluid Mechanics (Third year-UG) <i>IC-CEE</i>	Tutorial Sessions	28
2015-17	Fluid Mechanics (Second year-UG) <i>IC-CEE</i>	Tutorial Sessions	14
2013-14	Fluid Mechanics (UG) <i>VT</i>	Lecturer	120

*IC-AERO* = Imperial College London, Aeronautics (2018-2019), *IC-ESE* = Imperial College London, Earth Science and Engineering (2017-2018), *IC-CEE* = Imperial College London, Civil and Environmental Engineering (2014-2017), *VT* = Virginia Tech (2013-2014), *UG* = Undergraduate module, *PG* = Postgraduate module

EXPERIENCE  
WITH HPC

Period	Name	Location	CPU hours used
2019-	Eagle	USA (Rank 43th)	–
2019	MareNostrum	Spain (Rank 29th)	5k
2018-19	Sunway TaihuLight	China (Rank 3rd)	120k
2018-19	Hazel Hen (HLRS)	Germany (Rank 27th)	1.5k
2018-19	ARCHER	UK (Tier1) (Rank 131th)	30k
2017-18	MARCONI (CINECA)	Italy (Rank 15th)	5k
2015-19	ICL CX2	UK (Tier2)	400k
2016-17	UCL Thomas	UK (Tier2)	5k

PROFESSIONAL  
EXPERIENCE

- Private in the Hellenic Army (Corps of Signal) (May 2012-Feb 2013)
- Project management engineer for the construction of the new NATO Headquarters, HQPO NATO (Mar 2011-Sept 2011)
- Staff of the IAESTE office in NTUA, Athens, Greece
- Trainee Structural Engineer (2008-2010,2012)

AFFILIATIONS &  
PROFESSIONAL  
MEMBERSHIPS

- American Physical Society (APS)
- American Society of Mechanical Engineers (ASME)
- Society of Industrial and Applied Mathematics (SIAM)

- Hellenic Wind Energy Association (HWEA)
- Technical Chamber of Greece (Chartered Civil Engineer)

COMPUTER  
SKILLS

- CFD Code development and contributions to: WInc3D, Nalu-Wind, amr-wind, AMReX, xcompact3d, Fluidity, OpenFoam, FLORIS
- Programming Languages: C, C++, Python, Fortran, MatLab, L<sup>A</sup>T<sub>E</sub>X
- Visualization tools: Paraview, TecPlot, Scientific Python
- Operating systems: Unix/Linux, Mac OS, Windows
- Main developer and contributor to collaborative software projects (nalu-wind, amr-wind, fluidity, xcompact3d) available at my GitHub repository

PAPERS  
UNDER REVIEW

1. **Deskos G.** “A linear forcing method to model wind-wave interactions in marine atmospheric boundary layer simulations”. **In preparation for submission to the Journal of the Atmospheric Sciences.**
2. **Deskos G.**, M. Chetan, and W. Musial. “A Numerical Study of the Impact of Tropical Cyclones on Offshore Wind Turbines”. **Under submission to the Wind Energy Science Journal.**

JOURNAL  
ARTICLES

1. N. Bempedelis, S. Laizet, and **G. Deskos**. “Turbulent entrainment in finite-length wind farms”. *Journal of Fluid Mechanics* 955 (2023), A12. DOI: [10.1017/jfm.2022.1064](https://doi.org/10.1017/jfm.2022.1064).
2. M. S. Gomez, J. K. Lundquist, **G. Deskos**, S. R. Arwade, A. T. Myers, and J. F. Hajjar. “Wind Fields in Category 13 Tropical Cyclones Are Not Fully Represented in Wind Turbine Design Standards”. *Journal of Geophysical Research: Atmospheres* 128.16 (2023). DOI: <https://doi.org/10.1029/2023JD039233>.
3. A. Hodgkin, G. Deskos, and S. Laizet. “On the interaction of a wind turbine wake with a conventionally neutral atmospheric boundary layer”. *International Journal of Heat and Fluid Flow* 102 (2023), p. 109165. DOI: <https://doi.org/10.1016/j.ijheatfluidflow.2023.109165>.
